Education

National Higher School of Artificial Intelligence "Ingéniorat" (Algerian 5-year undergraduate degree) in Artificial Intelligence	2021 – 2026 (Expected) Algiers, Algeria
Relevant coursework: Software Engineering, Networks & Protocols, Wireless Network Systems, Web Development, NLP, Deep Learning, Reinforcement Learning, Computer Vision, Machine Learning, Data Mining, Time Series Analysis & Classification, Operational Research, Computer & Network Security, Project Management	
Al Amrani High School Baccalaureate Graduate - GPA: 17.88/20 (3.57/4.0)	2018 – 2021 Batna, Algeria

Professional Experience

Project Manager - Startup Incubator Algérie Télécom	Jun 2025 – Present Algiers, Algeria
- Leading startup mentorship and incubation programs, supporting entrepreneurs from ideation to scaling. - Organizing and coordinating startup events, workshops, and networking sessions to strengthen Algeria's innovation ecosystem. - Providing strategic and technical guidance to startups, bridging product vision with AI-driven solutions.	
AI Engineer Base360 / Flex Living	Jun 2025 – Sep 2025 Remote
- Developed intelligent pre-check-in flows with automated ID verification and multi-step validation processes. - Implemented dynamic upsell systems using property-based configuration and automatic multi-language detection with AI. - Built full-stack guest management tools using React, FastAPI, and Tailwind CSS to enhance hospitality automation.	
Founder & Product Owner Gostu	2023 – 2024 Algeria
- Achieved national recognition by securing the first "Label de projet innovant et startup" awarded by the Ministry of Knowledge Economy, Startups and Micro Enterprises - Led a multidisciplinary team of developers and designers to develop a comprehensive platform featuring forums, resources, AI-powered assistants, and access to private tutoring - Oversaw the deployment of Gostu's web platform and Android application, ensuring seamless user experience and accessibility - Implemented subscription models with tiered access levels and secure payment processing	
Intern - National Operations Center (NOC) Department ENMSR - Algérie Télécom	Sep 2024 – Oct 2024 Algeria
- Participated in technical field interventions involving FTTX deployment, voice line maintenance, and 4G network diagnostics - Gained practical experience in monitoring and maintaining national network infrastructure, working with systems like Fiberhome, ZTE, Nokia, and Huawei - Enhanced account type management in a PHP-based internal platform, optimizing database queries by 60%	
Freelance Developer Various Clients	2022 – Present Remote
Developed custom web solutions for small businesses and individual clients	

Projects

Gostu.net React, WebRTC, Laravel, Meilisearch, Tailwind	2023 – 2024
- Developed along with the team an EdTech platform with live collaborative study rooms serving Algerian students - Built interactive forums and study materials repository with advanced search capabilities	
Neural Network Threat Detection Python, XGBoost, SQLite, Pandas, Scikit-learn	2023
- Created an AI-powered system that detects and prevents network attacks in real-time - Implemented hierarchical classification to distinguish between benign traffic and specific attack types	

Achieved 99% accuracy in identifying malicious network patterns using XGBoost	
NLP Cyberbullying Detection <i>NLP, Python, TF-IDF, Random Forest</i>	2023
- Built NLP system to detect cyberbullying in Algerian dialect with 89% accuracy - Implemented custom text preprocessing for Arabic and French dialectal variations - Developed lightweight model suitable for edge deployment on social media platforms	
Semantic Search Engine <i>Python, BERT, Sentence-Transformers, Streamlit</i>	2022
- Engineered search engine using transformer-based embeddings to understand semantic meaning - Created Streamlit interface for intuitive user interaction with search functionality - Improved search relevance by 42% compared to traditional keyword-based approaches	
Medical Prescription Analysis <i>Python, Scikit-learn, Pandas, Association Rules</i>	2022
- Analyzed 93,000+ medical prescriptions to identify patterns in medication prescribing - Applied association rule mining to discover relationships between different medicines - Created recommendation system for end-users based on prescription patterns	
Base360 Guest Portal <i>React, FastAPI, Tailwind CSS</i>	2025
- Contributed to a full-stack hospitality automation system with intelligent pre-check-in and dynamic upselling features. - Applied AI techniques for Identity Verification and guest experience optimization.	
JADE CRÉATION - ERP System <i>React, Node.js, PostgreSQL</i>	2025
- Designed and built an ERP system for a perfume manufacturer, automating workflows from raw materials to finished products. - Implemented real-time inventory tracking, multi-role authorization, and multilingual support.	
Network Security Attack Implementation <i>Python, Scapy, Wireshark, Linux</i>	2022
- Developed practical demonstrations of common network attacks for educational purposes - Implemented Ping of Death, SYN flooding, and ARP spoofing attacks with detailed documentation	
Tali3 — Library Management System <i>React, MySQL, Java, REST APIs</i>	2021
- Designed and developed a full-stack application along with my team for tracking book inventory and user borrowing - Created dashboard with analytics on borrowing patterns and popular book categories	

Technical Skills

Languages & Frameworks: Python, PHP, JavaScript, SQL, Java, C++, Laravel, Dart, Flutter, React

Tools & Libraries: PyTorch, CUDA, TensorFlow, CV2, ROS2, Scikit-learn, Docker

Database & APIs: PostgreSQL, MySQL, MariaDB, MongoDB, REST APIs, GraphQL

Other: Git/GitHub, Figma, Performance Optimization

Soft Skills: Problem Solving, Self-learning, Adaptability, Teamwork, Project Management, Time Management

Languages: Arabic (Native), French (Fluent), English (Fluent), German (Basic)

Leadership & Volunteer Work

President, Skill&Tell Club

2021 – 2024

National Higher School of Artificial Intelligence (ENSIA)

Algiers, Algeria

- Pioneered ENSIA's first recognized student club as founding president, empowering students through events, workshops, and community-building initiatives
- Planned and contributed to the organization of over 20 events including hackathons, technical talks, and skill-development workshops
- Mentored successive generations of student leaders and built strong cross-department collaboration
- Fostered a culture of continuous learning and peer support across campus, receiving recognition from faculty and peers for student impact and community engagement
